EXPERIENCE

DECAGON, Lagos, Nigeria — *Software Engineer*

MARCH 2021 - PRESENT

I created secured REST APIs in Javascript and Typescript using Express.
I have written unit and functional tests for the APIs.
I also handled databases such as PostgreSQL and MongoDB
I also worked built containers for web applications with Docker

MENTOR WITHOUT BORDERS, Bucharest**,**Romania — *FrontEnd Developer(Mentee)*

August 2020 - November 2020

I learnt the fundamentals of frontend development using vanilla javascript and React

I also created frontend applications using React such as a todo-app and a calculator

EDUCATION

OBAFEMI AWOLOWO UNIVERSITY, Ile-ife, Osun state — *Mechanical Engineering*

JULY 2014 - JULY 2019

Alongside a team of young engineers, we created an evaporative cooling system with a peteir module. I also worked on how to increase the effectiveness of the blades of a rotary lawn mower.

PROJECTS

WeaƟr
I created a progressive web application (PWA) with vanilla javascript that gets the weather condition of any city and returns it to the user's screen in a styled format.
I learnt how to use the fetch API, service worker and firebase hosting while creating this project.

SKILLS

HTML, CSS, JAVASCRIPT,

BOOTSTRAP,
MATERIAL-UI

REACT JS,

NODEJS

EXPRESS

MONGODB,
POSTGRESQL

DOCKER

ASSETS

I possess good communication skills.

I have a good team work spirit and great adaptability.

I have practical knowledge of Agile leadership

MOVIECLASH: [movie fight](#)

November 2020

This is an application that compares two movies based on their imdb rating, awards, revenue generated. I used the OMDb API to create this application. I also used the bulma css frame work for the styling. I also learnt to use the axios library for the API call. I also learnt more about rendering HTML elements dynamically in JAVASCRIPT

DECABLOG: [decablog](#)

May 2021

A full stack web application that allows creative minds to share ideas in written form. We used React, Material-UI, React-Router to build the frontend.
